**PICARDIE  
VALVES  
INDUSTRIES**

PVI (Picardie Valves Industries) has designed and manufactured high-quality and high-performance industrial valves for nearly a century.

These include butterfly valves (elastomer, PTFE or metal seats), ball valves (carbon steel, stainless steel, or others on request), MONOVAR® control valves, the unrivalled CLASAR® check valves, as well as gate and needle valves.

Our products are used in water, gas and other fluid distribution networks, for such varied sectors as petrochemicals, shipbuilding and general process manufacturing.

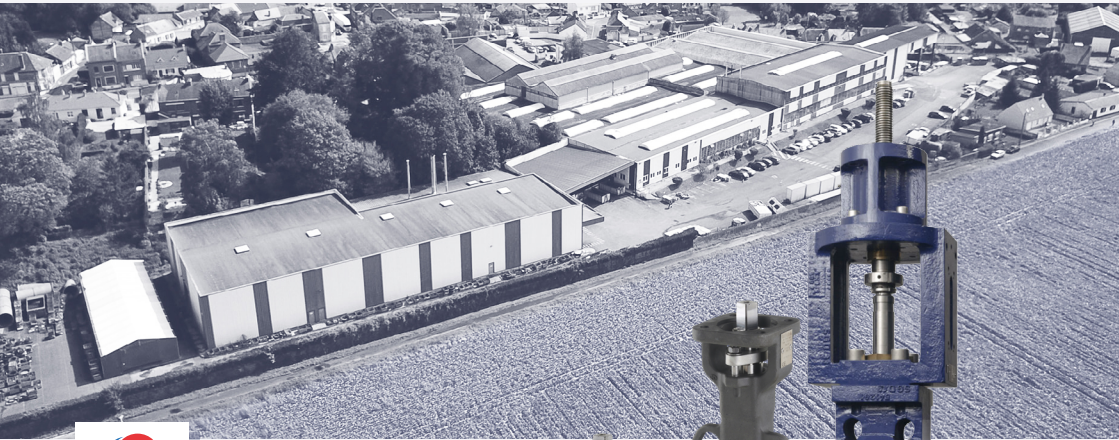

Our company currently employs over one hundred people. The corporate site not only groups together industrial valve machining, assembly and test units, but also all administrative, technical and sales departments.

This proximity enables PVI to provide optimal responsiveness, monitoring and compliance with our customers' requirements.

Our products can be found in more than 70 countries worldwide and our production is regularly exported to 6 continents.

Our Quality, Safety and Environmental Management System is certified by the following:

**ISO** 9001:2015    **ISO** 14001:2015    **ISO** 45001:2018
